### **Junior Civil Engineer or Professional Technologist**

A dynamic engineering firm is recruiting for a Junior Civil Engineer or Professional Technologist. Based in New Brunswick, the Junior Engineer/Technologist will play a vital role offering technical support and project management for projects in the province. The Junior Engineer/Technician will interact extensively with internal staff and the project staff of our various clients. Key interfaces include project superintendents, safety co-ordinators, quality managers, subcontractors, and customer project engineers and project managers.

#### **Responsibilities:**

- Preparing cost analyses & project cost controls
- Project tendering & estimating
- Preparing and reviewing budgets
- Coordinating client meetings and monthly billings
- Scheduling project staff & equipment resources
- Reviewing and negotiating Change Orders
- Reviewing the Drawing Registries
- Managing project deliverables
- Preparing Expressions of Interest and Pre-Qualifications

#### **Qualifications:**

- Civil Engineering degree or Civil Technologist diploma required
- Professional Engineering or Technologist designation highly preferred
- Familiarity with computerized scheduling.
- CAD drafting capabilities.
- Site experience with building construction projects.
- Ability to communicate in French and English is an asset

#### **Skills:**

- Specific experience working in the building construction industry
- Leadership & Team Work
- Customer Orientation
- Planning & Organization
- Initiative & Problem Solving

- Results Orientation
- Accountability

**E-mail submissions are preferred and should be sent to [resume@k-lineconstruction.com](mailto:resume@k-lineconstruction.com) or faxed to 506-328-4793. All resumes are confidential. Only those applicants being considered for a position will be contacted but thanks for your interest!**
